

Daksh Sawhney

Site Reliability Engineer (SRE) / DevOps Engineer — AWS · Azure · GCP — Kubernetes · Terraform · CI/CD

dakshsawhney@gmail.com | +91-9622727121 | Jammu, India

Portfolio | GitHub | LinkedIn

Summary

SRE/DevOps Engineer with hands-on experience across **AWS, Azure and GCP**, focused on **reliability, automation, and incident response**. Built and operated Kubernetes workloads with **Terraform-driven IaC, CI/CD pipelines**, and **Prometheus/Grafana observability**, cutting deployment time **70%** and API latency **40%**. Built a production-incident simulation platform to train engineers on **root cause analysis (RCA) and on-call troubleshooting** for real-world failure modes (CrashLoopBackOff, OOMKilled, DNS failures, DB exhaustion).

Experience

Multi-Cloud Computing Instructor – SelfCode Academy

Jul 2026 – Present — Remote

- **Promoted** from DevOps Instructor based on strong technical delivery and learner outcomes; now design and teach a curriculum spanning **AWS, Azure, and GCP**.
- Translate platform-specific tooling into vendor-agnostic **multi-cloud DevOps/SRE fundamentals**, sharpening the ability to explain complex infra concepts clearly under high-pressure, high-visibility conditions.

DevOps Instructor – SelfCode Academy

Feb 2026 – Jun 2026 — Remote

- Designed and delivered **180+ hours of recorded DevOps/SRE course content**, including advanced modules on **FinOps, Site Reliability Engineering, and Platform Engineering** (Docker, Kubernetes, Terraform, CI/CD, incident response).
- Directed **2 capstone projects (14 hours combined – 9hr and 5hr tracks)**, guiding learners through end-to-end DevOps/SRE builds from architecture through deployment.
- Built **incident-based learning modules** simulating real system failures, teaching a structured **RCA/troubleshooting methodology** mirroring production on-call work.

AWS Cloud Intern – IPage UMS

Sept 2025 – Nov 2025 — Remote

- Engineered and deployed **serverless APIs** (AWS Lambda, API Gateway, DynamoDB) for production-facing features, cutting **API latency 40%** via Lambda memory tuning and cold-start optimization.
- Enforced **least-privilege IAM roles** per Lambda function and built **CloudWatch dashboards, alarms, and on-call runbooks**, cutting incident resolution time (**MTTR**) by **30%**.
- Reduced monthly Lambda compute cost by right-sizing memory/timeout configs – applying **FinOps** principles to a live production workload.

Projects

High-Availability Event Platform (Reliability & Scalability Engineering)

AWS EKS — Terraform — GitHub Actions — Prometheus — Grafana

- Engineered a highly-available deployment on **AWS EKS** using **Horizontal Pod Autoscaling** to absorb traffic spikes without manual intervention.
- Automated infrastructure provisioning with **Terraform** and **GitHub Actions CI/CD**, cutting deployment time from **40 min to 12 min (70% reduction)**.
- Load-tested to **50k concurrent users** while holding **less than 200ms p95 latency**; used Prometheus/Grafana to identify and fix HPA threshold and resource-limit misconfigurations causing degraded performance.

Incident Zero – Production Incident Simulation Platform for SRE Training

Azure — Terraform — Kubernetes — CI/CD — Incident Response — RCA

- Built a platform simulating real production incidents (**CrashLoopBackOff, OOMKilled pods, K8s DNS failures, DB pool exhaustion, latency spikes**) to train engineers in **on-call troubleshooting** and **RCA**.
- Designed **5+ failure scenarios** requiring log/metric/K8s-event correlation and formal **RCA documentation**; deployed on **Azure** (**Terraform**-provisioned VM Scale Sets, Load Balancer) with automated **CI/CD**.

Technical Skills

Cloud Platforms: AWS (EKS, Lambda, API Gateway, IAM, DynamoDB, CloudWatch), Azure (AKS, VMSS, Load Balancer), GCP fundamentals

DevOps & SRE Toolchain: Docker, Kubernetes, Terraform, GitHub Actions, ArgoCD, Prometheus, Grafana

Reliability Practices: Incident Response, RCA, Postmortems, Runbooks, SLA/SLO/SLI, MTTR Reduction, On-Call, FinOps

Languages & Core: Python, Bash, Linux, Networking Fundamentals

Education

Harcourt Butler Technical University

B.Tech in Computer Science and Engineering, CGPA: 8.2/10

Kanpur, India

Aug 2023 – Aug 2027
